

SAV 246.50**PERMANENT MAGNET MULTI-ANGLE SETTER**

Magnetic aid for welding and assembly with defined angles

APPLICATION

As a welding and assembly aid for frame processing with angles of 180°, 90°, 75°, 60°, 45° and 30°.

If higher holding forces are required, several mitre holders can be stacked. The maximum application temperature of 120 °C should not be exceeded. We therefore recommend using the mitre holders for the tack welds and then removing them.

DESIGN

All edges are magnetic. Provided holes allow easy and fast positioning.

Length	Width	mm		Holes	Rated holding force daN	Weight kg
		Thick-ness				
100	64	14		2 x ø5	30	0.26
